

MJR Quick-Check Low Cost Industrial Oil Analyser

FEATURES

- Easy to use industrial oil analyser
- Single channel model
- Lightweight and portable
- Provides quick information on oil contamination, degradation and equipment wear
- Test results available in one minute
- Tests both mineral and synthetic oils.
- Tests the three critical areas of industrial oils:
 - Oil Chemistry
 - System contamination
 - Machine Wear

BENEFITS

- Economical addition to your industrial oil analysis program
- MJR have incorporated innovations that make achieving accurate results and diagnosing machine and lubrication problems easier than ever before
- Combines dielectric constant and magnetic separation to detect chemical change, as well as ferrous, non-ferrous, and liquid contaminants.
